PROFILE

MERN Full Stack Developer with 1.7+ years of experience building scalable web applications using React.js, Next.js, Node.js, Express.js, MongoDB and MySQL. Experienced in developing secure REST APIs, reusable component architecture, role-based authentication, cloud deployment and performance optimization to deliver reliable business solutions.

EDUCATION

Dewan VS Institute of Engineering & Technology

Aug 2019 – June 2023

B.Tech in Computer Science - **8.35**

Meerut

SKILLS

Frontend : React.js, Next.js, TypeScript, Javascript(ES6+), Tailwind, HTML5, CSS

Backend : Node.js, Express.js, REST APIs, JWT Authentication, Authorization

Database : MongoDB, MySQL

Cloud & Tools : AWS EC2,S3, Git Github,Postman, Jira

PROFESSIONAL EXPERIENCE

SourceryIT | MERN Developer

Dec 2024 - Present Noida

Project : Fix & Furinsh | *React JS, Node JS, Express JS, MySQL*

- Developed an end-to-end service management platform enabling customers, sellers, technicians, and administrators to manage the complete service lifecycle.
- Boosted API efficiency by **35%** via React Query caching and reduced page load time by **28%** through Vite optimization and code splitting
- Designed a role-based access control (RBAC) system using JWT authentication, improving application security and ensuring secure access across multiple user roles.
- Optimized MySQL queries and REST APIs, reducing response time by approximately **25–30%** for frequently accessed modules.
- Built reusable React components, reducing duplicate code and accelerating feature development across multiple screens.
- Integrated responsive interfaces with backend APIs, improving overall user experience across desktop and mobile devices.

Project : Snake & Ladder Multiplayer Game | *React.js, Node.js, Express.js, MongoDB, Socket.IO*

- Developed a real-time multiplayer game using Socket.IO, enabling low-latency communication between players.
- Optimized socket event handling, reducing unnecessary network traffic by approximately **20–25%**.
- Implemented authentication, score tracking, and match history, enhancing player engagement.
- Designed scalable backend game logic capable of handling multiple concurrent game rooms.
- Improved frontend rendering performance using efficient React state management, reducing unnecessary re-renders.

Project : Solventum | *React JS, TypeScript, Plotly, Redux*

- Developed healthcare analytics dashboards using React.js, TypeScript, and Plotly, replacing manual spreadsheet-based analysis with interactive visualizations
- Cut production by **40%** by enforcing TypeScript strict mode and standardized error boundaries
- Built reusable Plotly components, reducing dashboard development effort by approximately **30%**.
- Optimized Redux state management, reducing unnecessary API calls and improving dashboard responsiveness.
- Implemented dynamic filtering and reporting features, enabling stakeholders to analyze healthcare data significantly faster.
- Integrated REST APIs for real-time reporting, improving data accuracy and business decision-making.

ConsultIT | web Developer

Sep 2023 - Feb 2024 Noida

Project : Calculator Web Application

- Designed and developed a responsive calculator using React.js.
- Implemented arithmetic operations and expression evaluation with state management using React Hooks.
- Added input validation, clear/reset functionality, and error handling for invalid operations.
- Followed reusable component-based architecture for better maintainability.

Achievements

- Developed Published a research paper during graduation and received a participation certificate
- Actively participated in technical workshops, events, and college activities
